

Open Position: Quality Inspector Company: Drake Plastics - Cypress, Texas

About the Company:

Drake Plastics is a lean manufacturing business focused on the processing of high-performance polymers, with expertise in extrusion, injection molding, machining & prototyping. Operating since 1996, we are an industry leader and supplier to worldwide companies within the aerospace, medical, semiconductor, and oil and gas industries. We take pride in our forward leaning approach to business and our workplace flexibility.

About the Position:

The full-time Quality Inspector will work both independently and as a team member of all facets of the production departments within a fast-paced lean manufacturing environment. We are looking for a driven and experienced individual who is a self-starter, quick learner and has a proven track record of success in a similar role. Candidate will play a vital role in assuring our product and parts are delivered to all customer specifications utilizing an organized and capable approach to inspections and quality assurance processes at multiple stages of production.

Primary Responsibilities:

- Hands on first article, in-process, and final inspection for products and finished parts
- Develop and execute inspection plans, techniques, and reports
- Material/certification review, verification, and compliance reporting
- Set-up and operate precision measurement equipment
- Coordination/collaboration with third party inspectors, auditors, and equipment/instrument calibration
- Support the production quality initiatives related to all facets of the fabrication, molding, extrusion, and medical departments

Primary Competencies/Qualifications:

- 3-5 years of proven expertise with precision measurement equipment and inspection methodologies
- Comprehensive experience reading and interpreting engineering prints and GD&T
- Understanding and experience in development and execution of Quality Control systems and process knowledge and improvement
- Direct experience/knowledge of the following measurement tools:
 - CMM - Zeiss / Calypso
 - Vision Systems - Ram Optical / Keyence
 - Optical Comparator
 - Faro Arm
 - Calipers, micrometers, height gage and precision manual tools
- Knowledge of FAI, PPAP and or PSO, SPC, Gauge R&R, ISO 9001, AS 9100, ISO 13485
- An excellent communicator, both written and verbal
- Ultra-high level of precision in all assigned task
- Self-motivated and dependable with a strong, efficient, and detail-oriented work ethic
- Must be physically able to lift components regularly, and occasional lifts up to 75 lbs.

Benefits:

Drake offers competitive compensation, group health plans, paid time off, paid holidays, paid shut down period, 401(k) Retirement Plan, and tobacco free work environment.

Applicants should submit a cover letter and resume with evidence of successful work experience and capabilities related to the requirements above. Apply online at jobs@drakeplastics.com. No walk-ins please.
